## MODULAR DISPLAYS

The **h-line modular display system** addresses the needs of today's exhibitors who are looking for a full visual solution, set-up simplicity that is DIY-esque, and rivals the look of a custom built display. H-line answers these needs through use of the most vibrant dye-sublimation graphics that actually stay attached to the frames while being transported. In addition, it has a unique textile that does not require a blocker panel as well as a specific hardware connection system.

### Key attributes are:

- Full visual solution – no exposed metal
- Simplified I&D – one simple connector
- Graphics are pre-attached to the frames
- Unique textile that does not require a blocker
- One of the most cost effective displays on the market

**SHOWCASE YOUR IMAGE**

Put the graphic image front and center! No visible aluminum profile on backwalls means your message is even more effective and your display becomes an environment.

**ENDLESS MODULARITY**

All module types can be connected to one another -- no restrictions! Rest assured that you can use your booth in every space, even those you have yet to consider. H-line is a completely scalable solution that grows along with your company.

**FOCUS ON THE ESSENTIALS!**

Each module has been designed to provide its own unique functionality (communicate, display, design, spread your message, store, and welcome customers).

**BE CREATIVE!**

Distinguish your company by creating your own custom graphic or use solid colors or patterns.

**CLEVER & SIMPLE**

H-line requires zero technical expertise and is set-up without the use of tools. Set-up the booth yourself, or minimize labor cost. Panels ship with graphics installed. Two people can set-up a 20ft in-line in less than 20 minutes - take down is even faster!

Don't forget to add printed InStep™ carpet!
